

NWEA MAP Ohio Leadership Summit

From Theory to Practice

Strategies for Deepening Your Initiatives:
Modeled with MAP Growth

LEARNING TARGETS

- Explore research that supports best practices for initiative implementation
- Identify potential pitfalls and barriers to effective MAP Growth initiatives
- Identify workable strategies to strengthen and deepen your MAP Growth journey
- Analyze essential MAP Growth reports to relate your data story more effectively

Where are you on the path of your MAP Growth journey? What story is your data telling? Are you achieving the desired outcomes of your initiative?

Join us for a day of learning and exploration where we model from theory to practice. We will begin by sharing research and tools from *The National Implementation Research Network* around deepening educational initiatives in your district and school, including a framework of best practices for building competency, leadership and organizational structures. We will facilitate planning and reflection to set a clear purpose for MAP Growth assessment, and communicate expectations for data use and teaching/learning outcomes. We will model MAP Growth data analysis of essential reports and provide time for you to practice with your own data. You will walk away empowered to share your data story and equipped with ready-to-use strategies to increase your staff's understanding of and engagement with MAP Growth.
